PROFESSIONAL SUMMARY

Engineering Technology student with over seven years of hands-on experience in electronics and mechanical systems, specializing in troubleshooting, component evaluation, and circuit analysis. Proficient in PLC and FPGA programming, with experience in Siemens TIA Portal, Allen-Bradley RSLogix500, LabVIEW, and programming languages including C and Python. Skilled in interpreting electrical schematics, performing component-level repairs, and utilizing industry-standard diagnostic tools to ensure system functionality and reliability. Combines academic focus in mechatronics, robotics, and smart manufacturing with practical experience in improving accuracy, efficiency, and technical workflows. Recognized for strong analytical thinking, attention to detail, and the ability to execute complex technical tasks under strict quality standards.

TECHNICAL SKILLS & QUALIFICATIONS

- **Software / Programming:** Siemens TIA portal, Allen Bradley - RSLogix500, Quartus Prime Lite, FPGA programming, Programming languages: C and Python, National Instruments: Multisim and LabView, Programming, Drafting & Modeling: AutoCAD and Inventor, Microsoft Office Suite (Word / Excel / PowerPoint / Access / Outlook / Visio)
- **Electrical Equipment / Tools:** Digital / Analog Multimeters, Digital / Analog Oscilloscopes, Soldering, Semiconductors, Printed Circuit Boards, Shortboards, Microprocessors, Resistors, Transistors, MOSFET (Metal–Oxide–Semiconductor Field-Effect Transistor), Capacitors, Terminal Blocks, RJ-45 Cable Assembly, Crimping Tools, Wire Strippers, Sirens, Alarms, Timers, LEDs, Power Supplies, Hot Air Guns, Shrink Tubes, Frequency Generators, DAQ Controllers, Breadboards, Inductors, Jumper Cables, Voltage Generators, Glue Guns, Power Drills
- **Troubleshooting:** Analyze Electrical Schematics / Diagrams, Desoldering, Component Replacement, Circuit Analysis

Certifications & Workforce Development

- Autodesk AutoCAD Certified User
- Autodesk Inventor Certified User
- Autodesk Revit Certified User
- OSHA 10-HR
- NASA Community College Aerospace Scholars (NCAS)
- Mission Concept Institute (MCI), L'SPACE, NASA
- National Career Readiness Program – Gold Certificate

- New Century Workforce Pathways Scholar

EDUCATION

ECPI University, Virginia Beach, VA

August 2024 – Present

Bachelor of Science Degree in Electronics Engineering Technology, Concentration in Mechatronics

Current GPA – 3.66 / 4.0

Anticipated Graduation Date – August 2026

Key Coursework: Programmable Logic Controllers (PLCs), Field-Programmable Gate Arrays (FPGA), Electric Circuits, Electronics, Digital Systems, Microcontrollers, Smart Manufacturing and Robotics, Project Management

Hinds Community College, Jackson, MS

August 2020 – May 2024

Associate of Science Degree in Network Technology – 2024

Associate of Science Degree in Computer Programming - 2023

Associate of Science Degree in Engineering Drafting and Design -2022 with Honors

WORK EXPERIENCE

Freelance Professional; Jackson, MS.

January 2016 – Present

Royal Manor Productions

- Execute multiple technical and project-based assignments while meeting defined specifications, deadlines, and quality standards.
- Apply structured problem-solving and attention to detail to ensure accuracy, repeatability, and reliability of work outputs.
- Utilize technical documentation practices, digital tools, and workflow processes comparable to those used in engineering and manufacturing environments.
- Communicate with clients to gather requirements, clarify constraints, and confirm deliverables, supporting efficient project execution.
- Work independently in self-directed environments, demonstrating strong time management, accountability, and adaptability.

AI Trainer; Jackson, MS.

July 2025 – January 2026

TELUS International

- Improved AI response accuracy by approximately 25% by consistently identifying errors, ambiguities, and policy violations in model outputs and providing corrective feedback.
- Reviewed, evaluated, and annotated 1,000+ AI-generated responses while maintaining an accuracy rate above 95% in accordance with quality guidelines.
- Increased model consistency and clarity by applying structured evaluation criteria and identified recurring failure patterns that helped refine training guidelines.
